

What price range do you build in?

We build across all levels – from entry level to high end custom. We believe that any home, regardless of the price, should be done right. We pride ourselves on building the best house for the money.

What makes you different than other builders?

Our core philosophy of using quality products that will last. We especially love Andersen Windows, Kohler, James Hardie, TimberTech, and Emtek. We build a home that will be a solid investment for the owner – we don't cut any corners and we fully expect our customers to be customers for life. We were pleasantly surprised to win the Parade of Homes 2007 People's Choice Awards in all categories. We were thrilled that people toured our home and understood the quality and craftsmanship.

Where do you build?

Forest Ridge (Hayden), Radiant Lake (Rathdrum), Tuscany Place (Post Falls) and Progress Properties (Spokane Valley), plus any custom lots near Coeur d'Alene and Spokane. We help people select a location and a home that will be a great long-term investment.

What is your favorite aspect of building homes?

We love working with customers so we create a home that fits their needs, has a good flow, and "feels right" when you are in the home. We also like giving them the best products for the money.
